WHAT IS FULL STACK DEVELOPMENT?

One of the skills in an up-rise in today's market, becoming a full-stack developer is an aim every web developer has. A full-stack developer has the ability to develop a product from scratch to finish using back-end, front-end, database and DevOps knowledge. There are a lot of organisations who have started hiring full-stack developers who have all the above skills instead of hiring skill-wise.

ABOUT THE COURSE

Full Stack Developers are in high demand in today's job market. Facebook, Google, Uber and countless so-called Unicorn startups have been achieving great heights because of their technology stack. A rigorous learning program for beginners and professionals to learn various technologies to become full stack development from scratch. A comprehensive course intends to develop you as a master in coding and development.

The course will commence with understanding the basics of Web Development, through case studies and practical exploration of HTML, CSS and Bootstrap. Afterwards, you will get to create static HTML and CSS portfolio sites and landing pages.

Next up you will learn JavaScript & jQuery and understand the concept of JS Basics, JS Control Flow, JS Functions, JS Array, JS OOPs, jQuery and more. You will be guided to create dynamic applications using Java Script.

After learning JavaScript, you will get your hands on REACT, you will learn how to use React and build beautiful SPAs(Single Page Applications). You will also be taught Web developer tools like Git, and GitHub to add to your arsenal.

Now it's time that you learn how to build and manage databases. And also learn in-demand MongoDB database with Mongoose. Using this knowledge you will be able to build database schema for a Food ordering website to evaluate your learnings.

Last up you'll learn Back-end Web Development using NodeJS & ExpressJS. You will also learn REST APIs & Middlewares. Through case study you'll understand workflow of Front-end and Backend. Learn how to use NodeJS to write server- side JavaScript, Write complex web apps with multiple models and data associations, Use Express and MongoDB to create full-stack JS applications and Master the command line interface. Apply all your Back-end learnings to build a food ordering Website.

Using all the things which you have learn ,we will help you to build your own awesome projects that you can showcase to employers such as E-commerce Website, QnA Forum, Blogging Website.

WHAT WILL YOU LEARN

Fundamentals of Web Development

Why Web Development Case Studies of some best websites for Inspiration Introduction to the Web HTML5(Basic tags, Forms, Validations, Buttons, Basic Components) CSS3(Basics, Chrome Inspector tool, CSS Colors, Text, Font, Specificity, Flat UI colors, UI Gradients) Introduce to MDN and Google Stuff Bootstrap 4 (Structure, CDN, Forms, Navbars, Grid System + Flexbox, etc.)

Skills you will Learn

Learn JavaScript & J Query

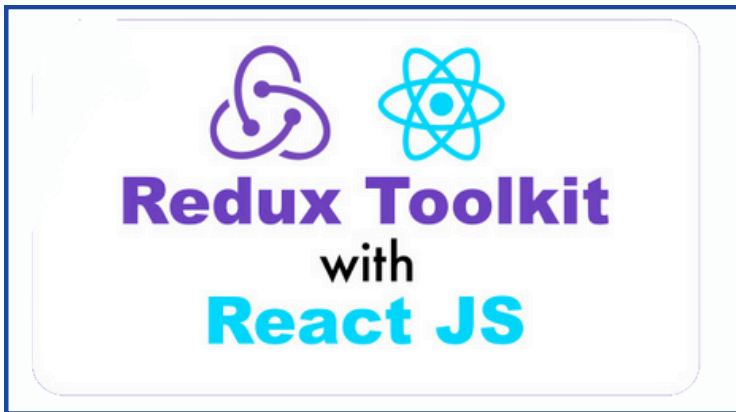

- Introduction to the JavaScript(Primitives, Variables, Null, Built-in Methods) JS Control Flow(Arithmetic & Comparison Operators, Conditionals, Switch, Loops, etc.) JS Functions(Basics, Return keyword, Arrow Functions) JS Arrays JS Oops (Objects, 'this' keyword, Objects v/s Arrays) Ajax Concepts and Advanced javaScript concepts ES6 & ES7 JS(Promises, Callbacks, Closures, For...of Loops, etc.) DOM Manipulation(vanilla JS, Manipulating Style,Text, Content, Attribute, Events) jQuery (Why, Selector, Attr, Val, Manipulating Class, Events - Click, Keypress, On, jQuery Effects) Font Awesome Using Stackoverflow efficiently

Skills you will Learn

React (Front-end Framework)

- Need for Front-end Frameworks
- What is MVC Framework
- Why React (Comparison & Benefits) React Components
- JSX
- React App - Props & State
- React Router

Web Developer Tools (Git/GitHub)

- What is Git VCS
- GitHub Intro
- GitHub Basic Commands(add, commit, log, checkout, etc) Git for Working in Teams Practices

Databases

- Use of Databases
- Basic SQL Queries to perform data operations MongoDB Intro & Installation
- Data/ Database Schemas & Data Associations Intro to Mongoose & Basic Commands
- CRUD operations

Skills you will Learn

Database
s

Mongo
DB

mongoose
simple mongodb object modeling for node.js

WHAT OUR CERTIFIED STUDENTS SAY ABOUT OUR COURSE?

Shwetal sangle

During the learning path I advanced my knowledge and skill about front-end and back end development. Moreover, the 1:1 placement assistance provided was commendable. Through the career support and guidance I got placed as Full stack developer in Nimap Infotech. Thank you Groot Infinity!

Nimap Infotech

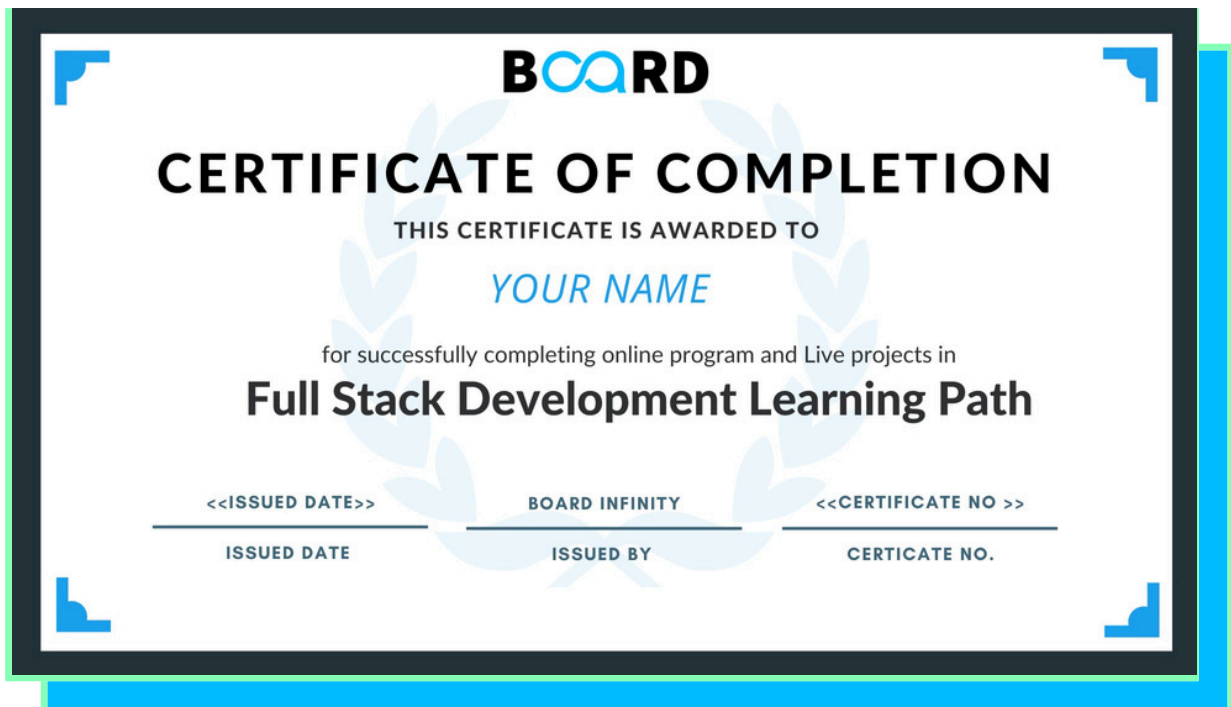

Amita Aradwad

Through Full Stack learning path I learned all the latest technologies and got equipped with both the technical and soft skills. The batchmates, coaches, BI team all were very supportive and contributed to the overall learning process. I'd surely recommend Groot Infinity for anyone who wants to advance their career in web development and get a job
